Turnitin Feedback Studio

LSU

Overview

Turnitin Feedback Studio is a web-based solution that puts the student's paper/ assignment at the center of the feedback process. Turnitin Feedback Studio provides ways to

- Reduce plagiarism
- Engage students
- Deliver rich feedback
- Simplify collection, distribution and access to student assignments
- Engage students in the writing process
- Save instructors time

Features & Best Practices

- Instructors must create a 'Turnitin Assignment' within a Moodle course to allow students to submit their files through Turnitin.

- When creating a Turnitin assignment in Moodle, a grade item will automatically be created in the gradebook. Be sure to go into the gradebook to ensure it is weighted properly and in the correct category (if applicable).

- Within a syllabus or Mooodle course, provide students a link to GROK article 17334 (see 'Resources') which provides instructions on how to submit files through Turnitin. Other GROK articles may also be useful to your students.

- Assignments are not limited to only papers or written assignments. Turnitin accepts any file type, however *Similarity Reports* can be generated for the following file types:

  Microsoft Word, PowerPoint, WordPerfect, PostScript, PDF, HTML, RTF, OpenOffice (ODT), Hangul (HWP), Google Docs (submitted via the Google Drive submission option), plain text files

- *Similarity Reports* enable students and instructors to compare student's work to other sources. The database includes 50+ billion web pages, 500+ million student papers, and over 140,000 journals, periodicals, and books. Color-coded and percentage-tagged highlights provide immediate insight into matched content.

- It can take up to 24 hours for Turnitin to generate a Similarity Report. If one is not generated after 24 hours, contact the Turnitin Help Desk at 866-816-5046 (ext. 241).

- Instructors have the ability to specify whether or not they would like students' assignments to be submitted into the Turnitin database/ repository.

- Turnitin helps instructors to save time and improve feedback through online grading where standard and customized *QuickMarks* appear directly on the student's paper. Grades are automatically synced to the gradebook within the Moodle course.

Turnitin Feedback Studio

LSU

- Use rubrics or grading forms to save time and provide consistency in the grading process. Rubrics are available for download: http://turnitin.com/en_us/community/teaching-tools/rubrics

- Give rich, personalized feedback with your own drag-and-drop comments, associate paper comments with rubric criteria, and use voice comments to save time.

- *PeerMark* assignments allow students to read, review, and score or evaluate one or many papers submitted by their classmates.

- Grade anywhere using your iPad. Sync assignments to your iPad so you can grade them on- or off-line.
